“We see the open alliance as an important digitization option for achieving added value for our customers. SAM DIGITAL, SAMSON's digital portfolio, should harmonize optimally with the services offered through the Open Industry 4.0 Alliance. With the balanced understanding of openness and security of the architecture and the solutions that are built on it, the seamless integration of SAMSON's asset management solutions is a next logical step for us.”

„Trebing + Himstedt was one of the first members to join the Open Industry 4.0 Alliance to drive digitization in a network and ecosystem of manufacturers, providers and users. We see our core task in helping to create an open reference architecture based on standards and, above all, to link modern technologies with the real processes and practice-oriented use cases of our customers.“
