

# Open Edge Computing - an update -

**Konrad Heidrich**

OEC WG lead, working at Hilscher

# Open Edge Computing

Where are we?

# Open Edge Computing

## What are we doing?

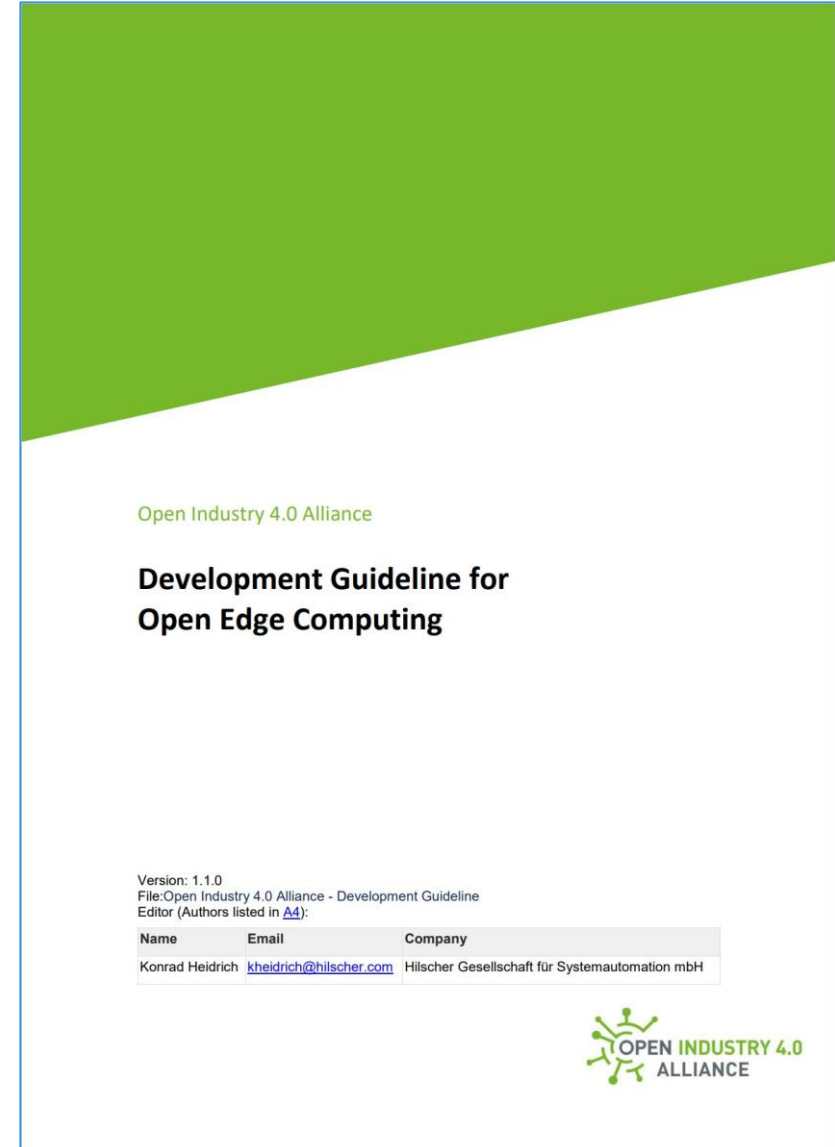

### Open-Source activities:

- OEC Registry
- Several application examples from the community for the community

### Documents:

- OEC Development Guideline v1.1
  - 3rd published version
  - 44 authors
  - > 200 pages
- Requirements for Interoperability v1.0
  - ~ 5 authors
  - Based on OEC Development Guideline V1.1
- Conformance check list for Open Edge Computing products v1.0
  - 2 authors
  - Based on OEC Development Guideline V1.1

# Open Edge Computing

## What to expect?

Being as open as our name sounds:

- We are publishing the OEC Development Guideline
  - as PDF and
  - on our web side
- The wg prepares some community source projects to publish them on GitHub

Recent work packages:

- Preparing reference mapping for DNP
- Planning SBoM integration to OEC
- OPC UA Part 14 compatibility
- Always overlapping activities with LNI4.0 and other organizations

Join us!

You are interested in Edge Computing, have know how in OT/IT or have ideas for great hardware or software for the Edge? We might need you!

- The results of the working groups can only ever be as good as the contribution of their active participants.
- We always need committed people with visions and good ideas to master the challenges ahead.
- Just contact [kheidrich@hilscher.com](mailto:kheidrich@hilscher.com), [info@openindustry4.com](mailto:info@openindustry4.com) or any other member of our working group to join our team!

# We need you!

**Thank you!**
